Wow, you usually work on these. Hope everything is cool. I will give you a call next week when I'm settled in to the EPA office here in Portlandia. I got lucky and they are going to give me a cube.

I may not be the PM for this one. Long story. Not sure on SMCRA. Don't have your number out there but you can call here and I can let you know alittle about what is in the packet.

Thanks for the heads-up. I take it the SMCRA permit was approved. Hopefully they included relevant info from the SMCRA permit application in the Section 404 application package. Please give me a call if you want to discuss the project at all before it goes on PN. I am in Portland, but working for Region 5 remotely for now. I'm not sure who this project will be assigned to on our end. I will let you know once I talk with Wendy. Please continue to keep us updated.

Just FYI

Seven Hills was brought in yesterday.
